

FACTSHEET

Company

Astro Pharma is a private Austrian pharmaceutical company, led by Sabine Möritz-Kaisergruber and Helmut Kaisergruber, who founded the company in 2004. In the meantime, around 35 professionals are working for Astro Pharma and share their expertise and knowledge of the Austrian Market.

We focus on affordable and innovative biosimilar products as well as niche products necessary to maintain and support the healthcare system of the future.

We act as general representatives for international pharmaceutical companies in Austria, but we also market own products like antibiotics or vaccines.

As our international network is combined with unique professional know-how regarding the local market, we are ready to face any challenge.

We offer extraordinary service with our own distribution system and customized solutions. As co-founder of the Biosimilars Association Austria (BIVÖ), we stand for sustainable conditions for biosimilars.

**30+ highly
experienced
professionals**
9 countries
10+ partners

Products

Our product portfolio includes Antibiotics, Vaccines, IVF- and Oncology-products. In addition to this, our product range includes Biosimilars, with which we have over ten years of experience. All our products are manufactured by established and experienced partners.

Partners

we market e.g.

- Biosimilars from the South Korean biopharmaceutical company **Celltrion Healthcare**
- a therapeutically important antibiotic from the German pharmaceutical company **InfectoPharm**
- IVF-products of **IBSA**, a pharmaceutical company based in Lugano, Switzerland
- Vaccines from **GlaxoSmithKline plc (GSK)**, a British pharmaceutical company
